

PALLET TRUCK WITH WEIGHT INDICATION

The HP ESE20/5 is built on the head of a completely standard hand pallet truck, which makes it different from all conventional pallet truck scales: the single fork structure contains no scale components and the forks keep their original dimensions.

Capacity: 2000 kg in 5 kg steps
 Scale functions: zero correction, total weight
 Electronic lifting height indication in display
 Power supply: 2 standard 1.5V AA / LR6 batteries
 Possible to reach 3,000 weightings on a set of batteries
 Original fork dimensions
 Splash proof: IP65

Only 2 keys needed for operation
 New: Totalization function!

Indicator powered by two AA batteries (2x1.2-1.5V), which are located behind a sealed cover

Schematic exploded view of product configuration

The “First weight indication system with electronic height indication” the ESE20/5 is used and assembled on a standard, normal and traditional hand pallet truck... one single chassis is needed only .. and that makes the big difference with all other traditional hand pallet trucks with scales, which need systematically a double chassis.
